Exterior

Use rubber mallet!

I

II

Wooden back wall assembly

Make sure the marking on the wall is centered in the notch.

IMPORTANT! Be sure to leave a ~1/4" gap when tightening screws to leave room for adjustment when the outer bands (B) are installed.

I

II

Join boards together (as shown in diagram III) that will bridge the width of the "A" gap. It is recommended that the combined boards are approximately 1/4" wider than the gap.

III

• Pre-drill holes $\varnothing 5/32"$

IV

Interior

ATTENTION!
HEATER GUARD MAY NOT MEET THE SAFETY
DISTANCES OF ALL HEATERS AND SHOULD
NOT BE USED IF THE HEATER DOES NOT FIT!

If Your sauna heater is smaller, You
can cut DET 15a to lenght from the
non-tapered end to better fit your heater.

II

III

IV

Attention! Refer to shingle
installation instructions
provided on package.

Installation Instructions

When building a wooden product, it is important to follow all installation instructions to ensure the quality and durability is guaranteed.

Important!

Identification number of the Product / Serial Number: **123456789**

Must be accompanied by the serial number to identify the product.

General Installation

- **Careful handling:** Treat all wooden parts with care during assembly to avoid scratches or friction.
- **Level foundation:** Ensure the sauna sits on a stable, level foundation for proper door and window operation. Ensure the base has enough stability to support the sauna.
- **Proper drainage:** Avoid constant water exposure to wooden materials.
- **Electrical and plumbing:** Hire qualified professionals for electrical work, including heater and lighting installation.
- **Wood treatment:** To ensure optimal performance and longevity of your Sauna, proper wood treatment is crucial. We strongly recommend treating all wooden components with a wood preservative. This includes unfinished skirting boards, if applicable, which should be treated immediately upon assembly.

Door and Window Maintenance

- **Regular checks:** Regularly inspect window and door hinges and locks. Tighten loose components and lubricate as needed.

• DOOR ADJUSTMENT INSTRUCTIONS

- You will need 3-mm (6) and 5-mm (3) hexagon keys for adjusting the hinges. Remove the plastic covers from the hinges (1). Loosen the fixing screws (2) one turn (do not remove the glass). If needed, the door can be shimmed up a bit from here vertically. If it needs to be adjusted left or right, turn the screws (4 & 5) as required. If one screw is turned counterclockwise, the other must be turned clockwise. Make sure both screws are tight when you have completed this step. Then tighten the fixing screws (2) when adjusted.
