

SAUNA^o
by THERMORY[®]

Heat up
your lifestyle

Enhanced from the inside out

(shingles not included)

With a strong tradition going back centuries (or even longer), saunas are popular fixtures all over the world. But what is a sauna and why does it appeal to so many?

Those are welcomed feelings for many, especially for their physical and mental health benefits, which may include:

- Reduced risk of cardiovascular disease
- Healthier skin
- Relieved muscle aches
- Mental relaxation
- Improved sleep
- And much more!

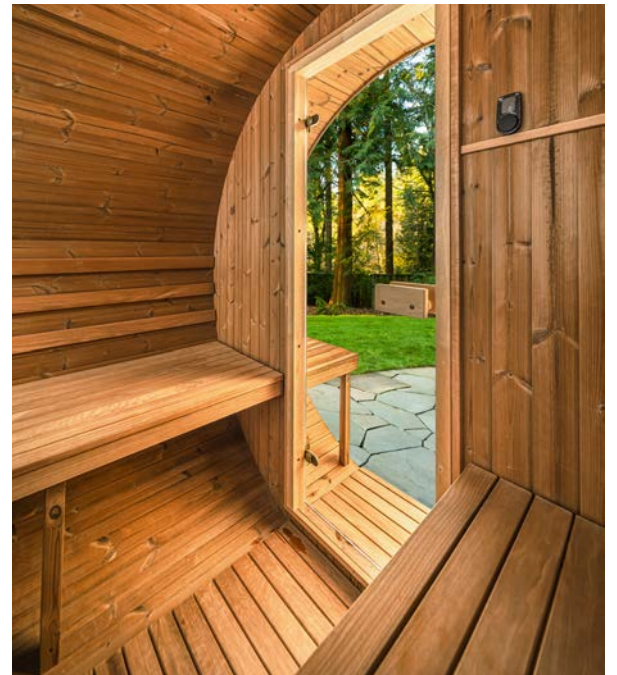

The basic premise involves heating stones to a high temperature with water thrown on the stones to produce steam and a sensation of increased heat.

It brings a symphony of feelings. A tingle as your blood flow increases. A loosening of your muscles. A bead of sweat rolling down your back. A worry drifting away - then another and another.

Plus, a sauna is a perfect place to socialize and decompress with family and friends. It's not only warm and comfortable, but technology is prohibited. The minimal distractions encourage connection and conversation.

Ahead of the curve in every way

Behind the Magnolia tree? Next to the pool? To the right of the garage?
Build a perfect escape in your own backyard with this freestanding model.

Thermally Modified

Simply put, our wood handles the rigors of a sauna better than the rest. That's because our thermal modification process naturally enhances it using just heat and steam. This entirely modifies every board to its core leading to unrivaled rot- and moisture-resistance with exceptional durability.

Functional Design

A curved design prevents heat from getting trapped at the top of the room. Instead, the hot air circulates naturally along the rounded walls for quick and continuous warmth while using far less energy. Plus, our barrels are larger than most, which makes it comfortable for standing and laying down.

Ready to Assemble

Our saunas are designed with installation in mind. In fact, every sauna comes with pre-cut and pre-milled staves and cradles that can be set up in just four to six hours by a team of three to four people with moderate DIY skills. No cutting necessary.

It all starts with stunning spruce.

Our Nordic spruce is harvested exclusively in Scandinavia, a region known for the most responsible forestry in the world.

This spruce offers impressive rot resistance and longevity with a Class 1 durability rating of 25+ years. Combining rustic knots with a naturally light tone, the wood has a golden brown color when thermally modified that will gradually lighten to an attractive grey when left to the elements.
